

AURA PURE — Bottle Assembly Guide

1 · Component specifications

Locked dimensions for the AURA PURE 4 FL OZ shot bottle and wraparound label.

Cap

Sky-blue HDPE, tamper-evident seal

Bottle

Matte-black PET, frosted finish

Volume · 4 FL OZ (118 mL)

Label wrap

88 mm tall × 129 mm circumference

Full bleed; safe zone 3 mm inside trim

Wraps with 2 mm seam overlap

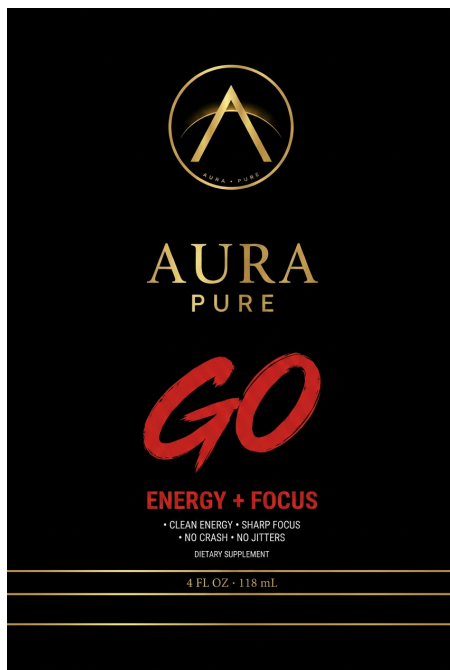

Locked spec

Bottle height	131.5 mm
Bottle diameter	41.5 mm
Label trim	88 × 129 mm
Bleed	+3 mm all sides → 94 × 135 mm
Safe zone	3 mm inside trim
Volume	4 FL OZ (118 mL)
Resolution	300 DPI · CMYK + gold spot (Pantone 871 C)
Material	Premium matte BOPP, gold foil hot-stamp

2 · Label application

Wraparound placement, alignment marks, and step-by-step assembly.

GO · ENERGY + FOCUS

RESET · CALM + RECOVERY

Application sequence

01 Inspect bottle

Wipe with lint-free cloth. Reject any unit with surface dust or scratches.

02 Align medallion

Position the AURA medallion centred on the bottle's vertical axis, 22 mm below the cap shoulder.

03 Apply label

Tack the leading 8 mm bleed, then roll the bottle across the applicator to wrap the remaining 121 mm. Seam overlaps the trailing bleed.

04 Squeegee

Use a felt squeegee top-to-bottom in one pass — no double strokes (prevents gold foil micro-scratches).

05 Heat-set

Pass through tunnel at 78 °C for 4 s to bond gold foil and seal seam.

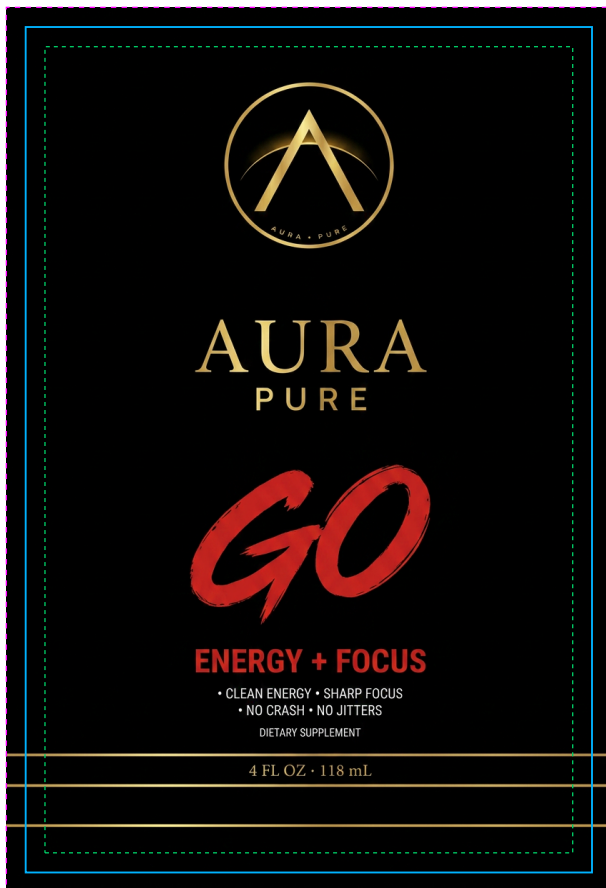

06 QC

Verify: AURA medallion centred ± 0.5 mm; gold hairlines parallel to base; '4 FL OZ · 118 mL' centred on lower hairline cartouche.

AURA PURE — Bottle Assembly Guide

3 • Dieline reference

Print-ready file legend. Magenta = bleed • Cyan = trim • Green = safe zone.

GO • 94 × 135 mm (trim 88 × 129)

RESET • 94 × 135 mm (trim 88 × 129)

File legend

-  Bleed line — extend artwork to this edge
 -  Trim line — final cut, 88 × 129 mm
 -  Safe zone — keep all critical type 3 mm inside trim
- Registration marks at corners for plate alignment
- Provide CMYK + Pantone 871 C spot channel for gold
